

I've been received and used these cables for a while, pretty satisfied with the sound quality and make all my mix clearer and more precise. Stabler bottom end, smoother high end, even at mid range frequency become more and more clear and bright that let my mixing decisions faster and easier. And also improving my mixing and productions to another level without a doubt. It saves a lot working times that I can do twice as fast as comparing to my old days. Highly recommend to all the sound engineers want to do more, faster and better jobs on their own career.
